

## Sample gas probe GAS 222.35 Atex

In many applications gas analysis is the key for safe and efficient control of process flows, environmental protection and quality assurance. In extractive gas analysis the location of the gas sampling point is crucial for the reproducibility and accuracy of the analysis results.

The specific filter capacity, corrosion resistance and functional equipment requirements for the probe arise from the composition of the sample gas.

However, operating costs are also an important criterion in the selection, as the sampling points are frequently located at hard to access points in the system. Effective particle filter backwashing options and low maintenance characterise the extensive GAS probe series.

### Versions with Atex approval

Heated probe with upstream filter and weather hood

The filter element can easily be removed by turning the handle 90°

The probe body and the area around the screw connection for the heated sample gas line are completely insulated

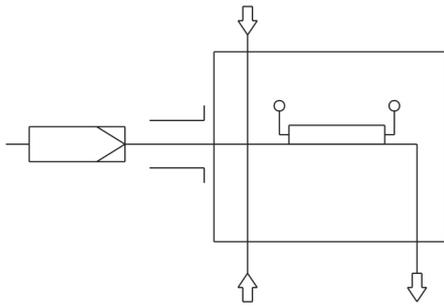

Heater self-regulating to approx. 176 °F

For dust loads up to 200 g/m<sup>3</sup>

This probe is permitted for use in explosive areas (Zone 21, 22 and extraction from Zone 20)

**Flow chart**

**Technical Data**

**Gas Probe Technical Data**

Ambient temperature without accessories:	-4 to 122 °F	
Ambient temperature for accessories:	<b>Component</b>	<b>Ambient temperature range</b>
	Compressed air valve:	14 °F < T <sub>amb</sub> < 140 °F
Permissible gas inlet temperatures:	<b>Outer zone temperature class</b>	<b>Permissible gas inlet temperature</b>
	T3	275 °F
	T4	266 °F
Self-regulating heater:	176 °F	
Electrical data:	Probe:	External circuit breaker type C:
	230 V, 2.0 A, 50/60 Hz	230 V, 2 A, 50/60 Hz
	115 V, 3.8 A, 50/60 Hz	115 V, 3 A, 50/60 Hz
Max. operating pressure	85 psia	
Max. flow rate:	16.66 lpm	
Material:	1.4571	
Parts in contact with media:	Seals: PTFE/Graphit/1.4404 and see filter	
Marks*:	ATEX:  1GD / 2GD T4 T130°C	

\* Please note, using special accessories may limit the approved applications of the probes.

**Ordering instructions**

The item number is a code for the configuration of your unit. Please use the following model key:

4622235	0	X	X	X	X	X	0	0	9	9	X	X	X	X	<b>Product Characteristics</b>
															<b>Flange</b>
															DIN DN65 PN6
															<b>Explosive outdoor areas</b>
	4														Zone 21
	5														Zone 22
															<b>Explosive indoor areas</b>
	3														Zone 20
	4														Zone 21
	5														Zone 22
															<b>Ex temperature classes</b>
	3														T3
	4														T4
															<b>Probe voltage</b>
	1														115 V
	2														230 V
															<b>Calibrating gas connection</b>
	0														No calibrating gas connection
	1														6 mm
	2														6 mm + check valve
	3														1/4"
	4														1/4" + check valve
															<b>Blowback with air reservoir <sup>2)</sup></b>
															<b>Compressed air valve / valve voltage information</b>
	0														Manual
	1														115 V (labelled "mb")
	2														230 V (labelled "mb")
	3														24 V (labelled "mb")
	9														None (if no blowback requested)
															<b>Pneumatic drive for ball valve</b>
	9														N/A
															<b>Limit switch for pneumatic drive</b>
	9														No
															<b>Control valve for pneumatic drive</b>
	9														No control valve

<sup>1)</sup> Please note, using certain accessories may limit gas probe use in Ex areas! Observe the respective operating manuals, accessory compatibility charts, and data sheets to ensure proper technical product design!

<sup>2)</sup> For flammable sample gas, always use inert gas for blowback. Probe blowback prohibited when using explosive gases!

**Options**

The base unit becomes functional by adding accessories suitable for the application. Please refer to accessory data sheet no. 461099 for information.

Please also refer to data sheet no. 461000 "GAS 222 Gas Probes" for a general description.
